

THE DAILY ROUTINE · 10 MINUTES

- 1 **Dashboard first.** Read Today's Work left → right.
- 2 **Chase HM feedback** — anything in Pending HM Review 2–3+ days gets a nudge.
- 3 **Follow-Ups Due** → **zero.** Touch, log, set next date.
- 4 **Prep today's interviews** — resume attached, Exec Brief current, HM confirmed.
- 5 **New resumes** → **From Resume**, act on auto-match notes.

UNIVERSAL SEARCH · WORKS FROM EVERY SCREEN

Person: type the name → click → file opens. One match? Press **Enter** .

Req: type title or number (1488) → Open Reqs & TalentBench listed with counts.

Power filter: **doors** AND "systems engineer" NOT **intern**

Closed/filled reqs never appear. Search also scans skills, notes & resume text.

STATUS FLOW · STATUS IS SACRED

rejections always get a reason + date

Update status the moment reality changes — it drives every view and count.

FOUR WAYS IN

PATH	USE WHEN
From Resume	One resume file. Parses everything, attaches file, auto-matches reqs into Notes .
+ Candidate	Referral / phone lead, no resume yet.
Import CSV	Batches — headers must match TalentBase columns.
Bulk Add	Many resume files → attached by filename match.

Golden rule: search the name FIRST. One candidate, one record.

SITE CODES

FWO / FTW / DET	Fort Worth, TX	CHS	Charleston, SC
MMO	Merrimack, NH	YUMA	Yuma, AZ
TAO	Talladega, AL	—	Roanoke, VA

TALENTFIT™ IN 20 SECONDS

Strong discipline + skills + level + location line up → submit with confidence (after the screen).

Possible real overlap with a gap — *adjacent discipline*, level jump, or relocation. Reasons say which.

Not a fit wrong discipline/domain — specialists only match their own lane.

Decision support, not the decision. Always verify clearance, comp, relocation.

The Candidate File & Submissions

TALENTBASE QUICK REFERENCE · PAGE 2

ANATOMY OF A CANDIDATE FILE

Exec Brief	3–4 sentences a client could read cold — keep it current.
TalentFit	scorecard of best req matches, ranked with reasons.
Skills	tags — comma-separated on entry.
Workflow	Status · Priority · Recruiter Owner · target Reqs.
Notes	running history + AUTO-INTAKE match block.
Resume	attached file — required before interviews.

RULES OF A CLEAN FILE

- 1 Status true, in real time.
- 2 Log every call / email / feedback **same day**.
- 3 Always set the **next follow-up date** after a touch.
- 4 Exec Brief stays client-ready.

INTERVIEWS

- 1 HM wants to meet → log an **Interview Request**.
- 2 Scheduled date → appears on the **Interview Calendar**.
- 3 After: log feedback same day, advance (or exit) status.

SEND TO HM — THE SUBMISSION

- 1 Open the candidate → **Send to HM**.
- 2 Package = profile + TalentFit verdict & reasons + resume, addressed to the req's hiring manager.
- 3 Set status → **Submitted** (counts in Pending HM Review).
- 4 No feedback in 2–3 business days → nudge.

REQS & TALENTBENCH

Open Reqs	active, funded Elbit MTC program roles.
TalentBench	sourcing pipeline — build ready-now benches before roles activate.
Toolkit	every req: ideal + broad LinkedIn searches, pre-written outreach.
HM directory	People & Reference → Hiring Managers (title, email, phone).

THE TWO HABITS

1. Keep Status true. 2. Always set the next follow-up.
Every dashboard, worklist, and client view flows from these two.
